FIG. 5

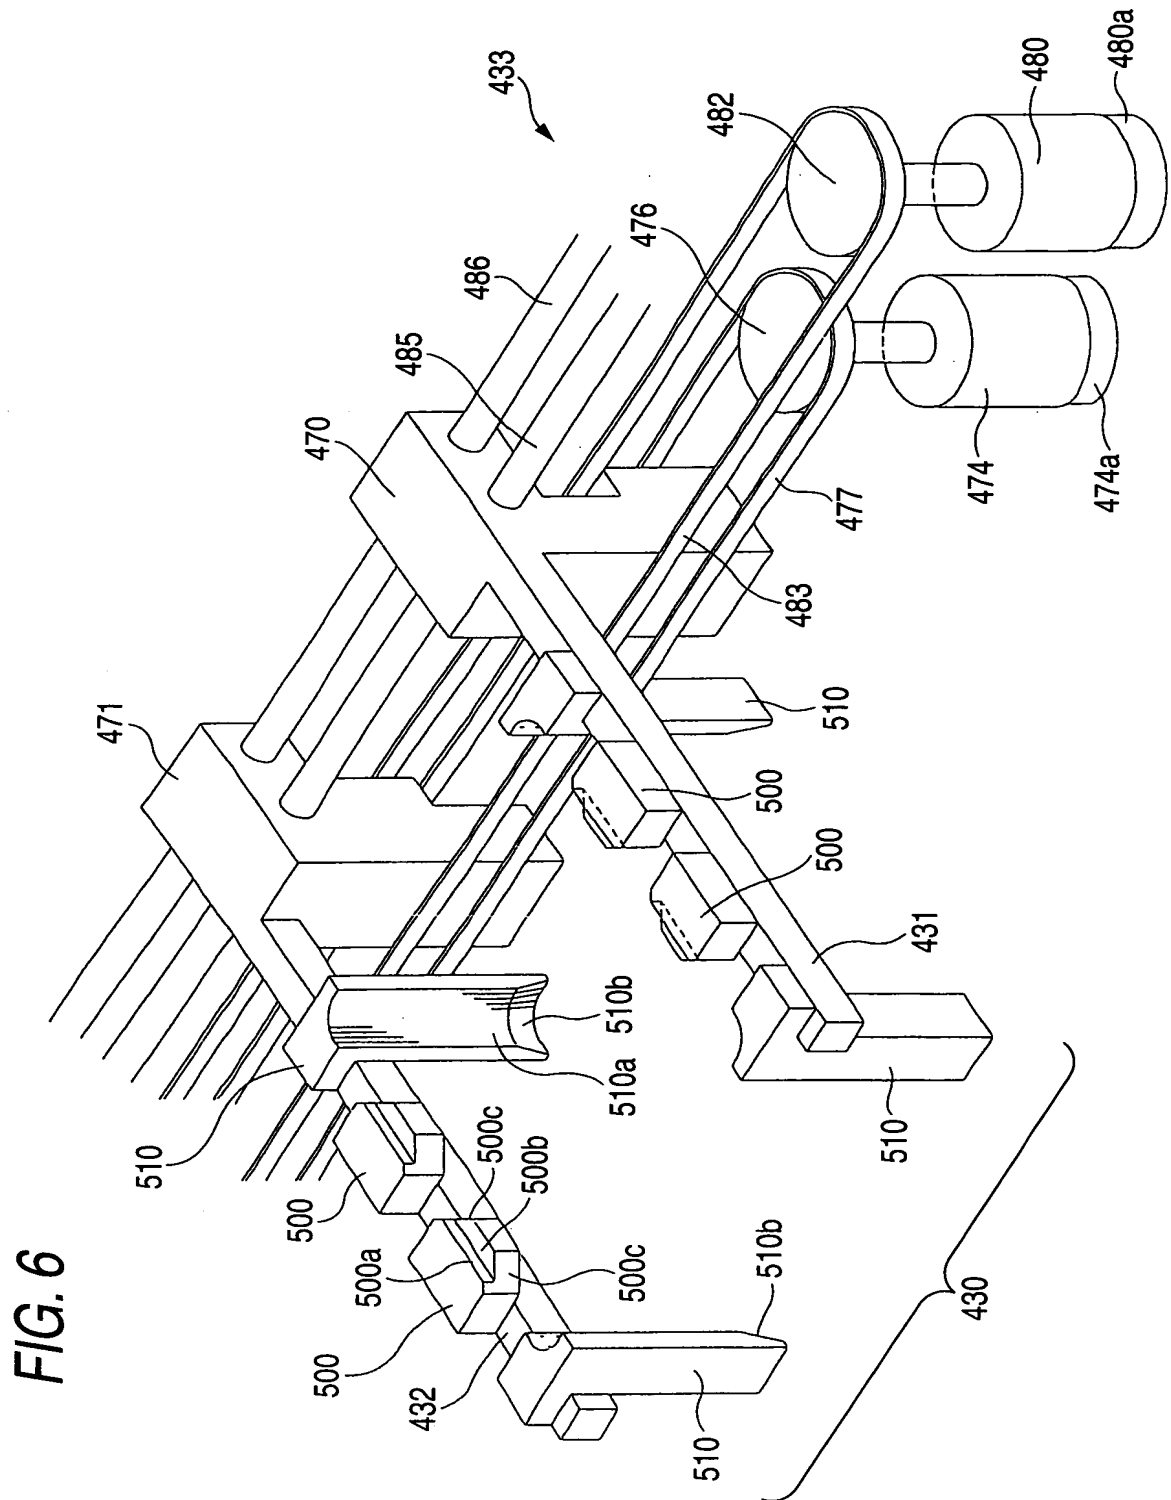

Figure 1 shows two cross-sectional views of a display device. The top view is a cross-section A-A' showing a panel 401 with a central layer 401c containing two light-emitting elements (LE) on a substrate 510. The panel is surrounded by a frame 500. The bottom view is a cross-section B-B' showing the same panel 401, showing the internal structure of the frame 500 and the panel 401, including a base 420 and a layer 411.
